
FOREWORD

"At MG, we are driven by innovation, passion, and partnership. We specialize in delivering exceptional, high-quality projects across key global locations, with a focus on architectural lighting and turnkey visual solutions. Our commitment to excellence is rooted in integrity, trust, and a dedication to exceeding client expectations. Together with our talented team, we consistently push boundaries to create lasting impact and foster strong, meaningful relationships worldwide. Proudly WBE-certified"

— **Orit Toledano - President & Co-Founder**

"I founded Media Graph over 30 years ago in a small 500 sq. ft. office with no experience in large-format printing—just a fascination with turning ideas into striking visuals. My passion for innovation and quality led us to constantly seek unique solutions that help our clients stand out. Every day, we take pride in our creativity, embracing new challenges and pushing boundaries to grow and evolve."

— **David Sellam, Founder, Media Graph**

“ When a talented team follows their passion, innovation flourishes, every detail matters, and the journey becomes as fun and inspiring as the destination”

Our dedication laid the foundation of Media Graph. A major milestone came in 2002 when we moved to Canada and expanded. That same year, Orit joined, bringing her expertise in client relations, which reshaped our customer service approach. Together, we built a team that embraced our core values—ownership, growth, and a commitment to quality.

Starting in Montreal was challenging, but we adapted to a new market by focusing on high-quality retail solutions. As pioneers in large-format textile printing, we soon explored backlit solutions. Collaborating with fabric suppliers, we developed specialized materials for vibrant, wrinkle-resistant lighting applications.

Driven by a need for a more efficient lighting solution, we developed and patented the TLS – Tension LED System. Our debut in architectural lighting was a success, earning us an innovation award and partnerships with 35 new agents.

By 2012, we moved into a 65,000 square-foot facility, bringing all our capabilities under one roof.

Most recently, we rebranded as MG, uniting TLS Architectural Lighting, MG Print & Display, and MG Signage under one name. As a woman-owned business, we remain committed to diversity, sustainability, and continuous innovation.

This binder offers a glimpse into our work. Let’s create standout solutions together, because at MG, **innovation makes anything possible.**

MEDIA GRAPH

Founded in 1995, Media Graph specializes in manufacturing and engineering cutting-edge visual display and architectural lighting technologies.

With all capabilities in-house, we offer **fast lead times** and **turnkey solutions**, including **TLS LED manufacturing, lab testing, Dye sublimation and UV printing, metal and wood fabrication, industrial and graphic design, welding, powder coating, and logistics.**

As a trusted **one-stop shop**, we handle complex projects for leading global brands. **Innovation drives our growth**, allowing us to design, develop, and manufacture patented, fully customizable solutions.

From concept to execution, our expert team ensures **high-quality results that exceed expectations**. No matter the size or complexity, we bring your ideas to life and our trained installers make sure your project stands out.

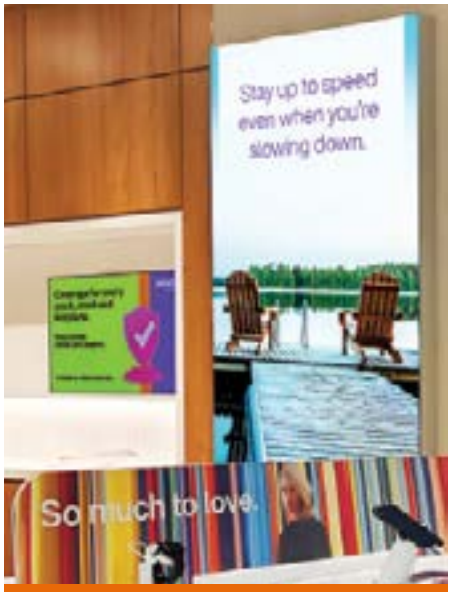
WBE Canada AIA IES UL

OUR BRANDS

Media Graph is a leader in innovation, delivering cutting-edge display systems, superwide-format printing, and lighting solutions. We design, produce, and manufacture **customized, turnkey solutions** that set industry standards. Supporting this success, we have established **three specialized brands** to enhance our capabilities and drive continuous growth.

TLS Architectural Lighting

TLS Architectural Lighting excels in achieving the three fundamental keys to successful architectural lighting: aesthetics, functionality, and efficiency. Our company offers a diverse range of products and solutions, including a selection of pre-defined products as well as customizable options.



PRINT & DISPLAY

With a foundation rooted in years of printing expertise, we specialize in delivering top-tier large format printing services. Our state-of-the-art technology, including our patented Tension LED System, allows us to offer innovative backlighting solutions. All our capabilities and expertise come together to deliver a strong, high-quality, and customized solution with P&D.

SIGNAGE

Our signage division specializes in **high-quality channel letters, outdoor light boxes with our TLS technology, and custom indoor/outdoor signage.** With **advanced in-house capabilities**, we support custom designs, **whether from your team or our experts, ensuring precision, fast turnaround, and seamless installation.**

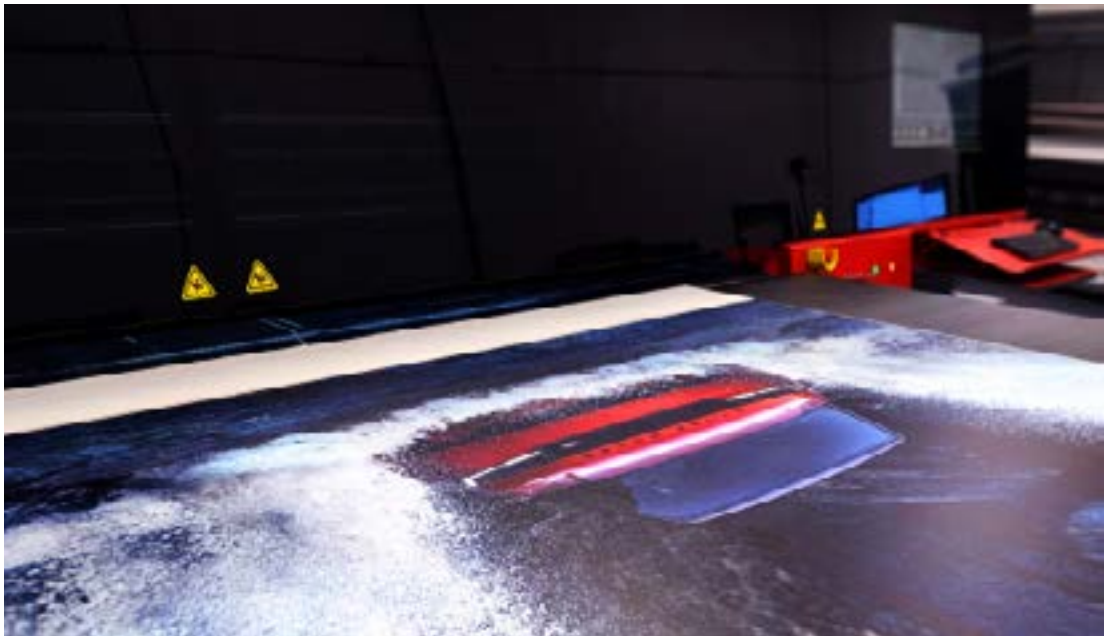
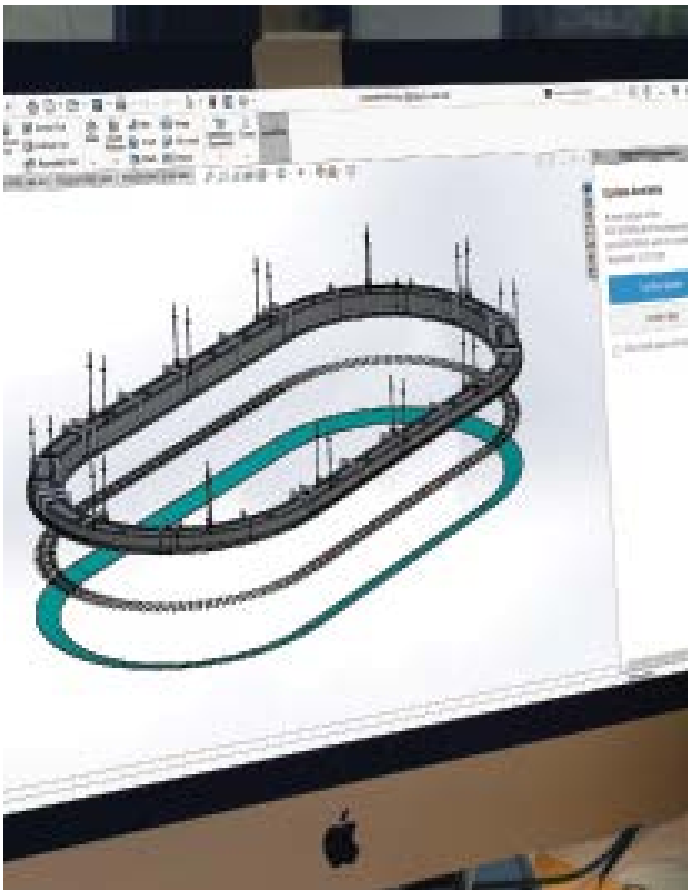
CAPABILITIES



At Media Graph, we take pride in our fully integrated in-house capabilities, covering R&D, printing, manufacturing, finishing, and logistics—all under one roof. Our proprietary MMS (Media Graph Management System) ERP ensures precision, efficiency, and fast turnaround, supporting our national clients with high logistics demands.

With TLS, our architectural lighting division, we control the entire manufacturing and design process, selecting tailored components to meet your project requirements efficiently—eliminating supplier delays.

We take full responsibility from concept to installation, ensuring a seamless process. Our state-of-the-art large-format printing department features advanced UV and Dye sublimation technology, delivering exceptional quality, consistency, and rapid production for even the most demanding projects.



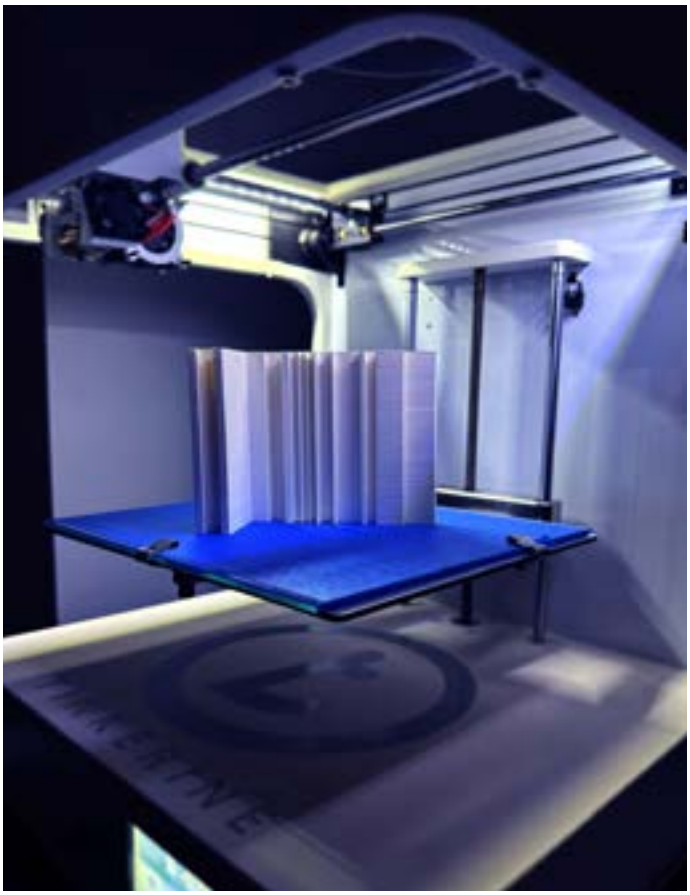
Design centre

ENGINEERS AND INDUSTRIAL DESIGNERS

Our expert designers and engineers guarantee that every project meets the highest standards of aesthetics, functionality, and ease of installation: lightweight, durable, and hassle-free to set up. We provide detailed shop drawings for approval before manufacturing, all seamlessly managed through our MMS (Media Graph Management System) to ensure flawless execution.

GRAPHIC DESIGNER

Our designers ensure high-quality graphics and precise color matching. With prepress and full design capabilities, our MMS approval system guarantees client-approved visuals, eliminating the risk of unwanted results.



Product development

RESEARCH AND DEVELOPMENT

R&D is in our DNA. We constantly innovate across design, mechanics, electronics, software, and firmware, keeping MG at the forefront of the market. We enhance existing products, seek out-of-the-box solutions, and prioritize client feedback to refine and accelerate development.

LABORATORY

Our fully-equipped laboratory ensures rigorous testing and quality assurance, guaranteeing that products will meet the highest standards.

Print & Finishing department

Our advanced large-format printing department handles all your projects on flexible or rigid materials. With state-of-the-art UV and Dye sublimation printers, plus transfer technology, we ensure top-quality, consistency, and fast turnaround.

TENSION LED SYSTEM

Innovation drives everything we do, leading to the creation of **TLS**, a revolutionary surface lighting solution. Traditional high-intensity LED frames struggle with **non-standard formats,** often resulting in **complex assembly, uneven brightness, and transportation challenges.** To overcome these limitations, **Media-Graph** invested in extensive R&D, launching **TLS (Tension LED System)** in 2012.

TLS features a **unique point-to-point, substrate-free mounting design,** allowing seamless integration into architectural environments. It provides uniform **backlighting across any size or shape,** regardless of plenum depth, offering unmatched versatility.

When paired with **SEG fabric**, TLS eliminates **hotspots and dark areas,** delivering flawless, evenly distributed illumination. Its tensioned structure simplifies **installation, reduces maintenance, and enhances durability,** making it an ideal choice for dynamic backlit applications.

With full **in-house design and production capabilities,** Media-Graph continuously refines **TLS technology,** setting a new standard in high-performance, adaptable lighting solutions.

TECHNOLOGY ADVANTAGES

Wiring

We pre-assemble all our products and solutions in house, this provides:
Clean wiring set on tension wires.
Ease of installation.

Tension mounting system

Our product is specially designed to allow:
A substrate free lighting grid system.
An easy access to equipment behind TLS system. (E.g. sprinklers, microphones, etc.)
A better acoustic transmission.
Tool free maintenance
(Boards can be removed individually).

Customization

TLS flexibility answers most project requests:
Pitch – distance between pixels
Cuttable LED boards
Limitless sizes and a vast array of shapes

COMPONENTS OF TLS SOLUTIONS

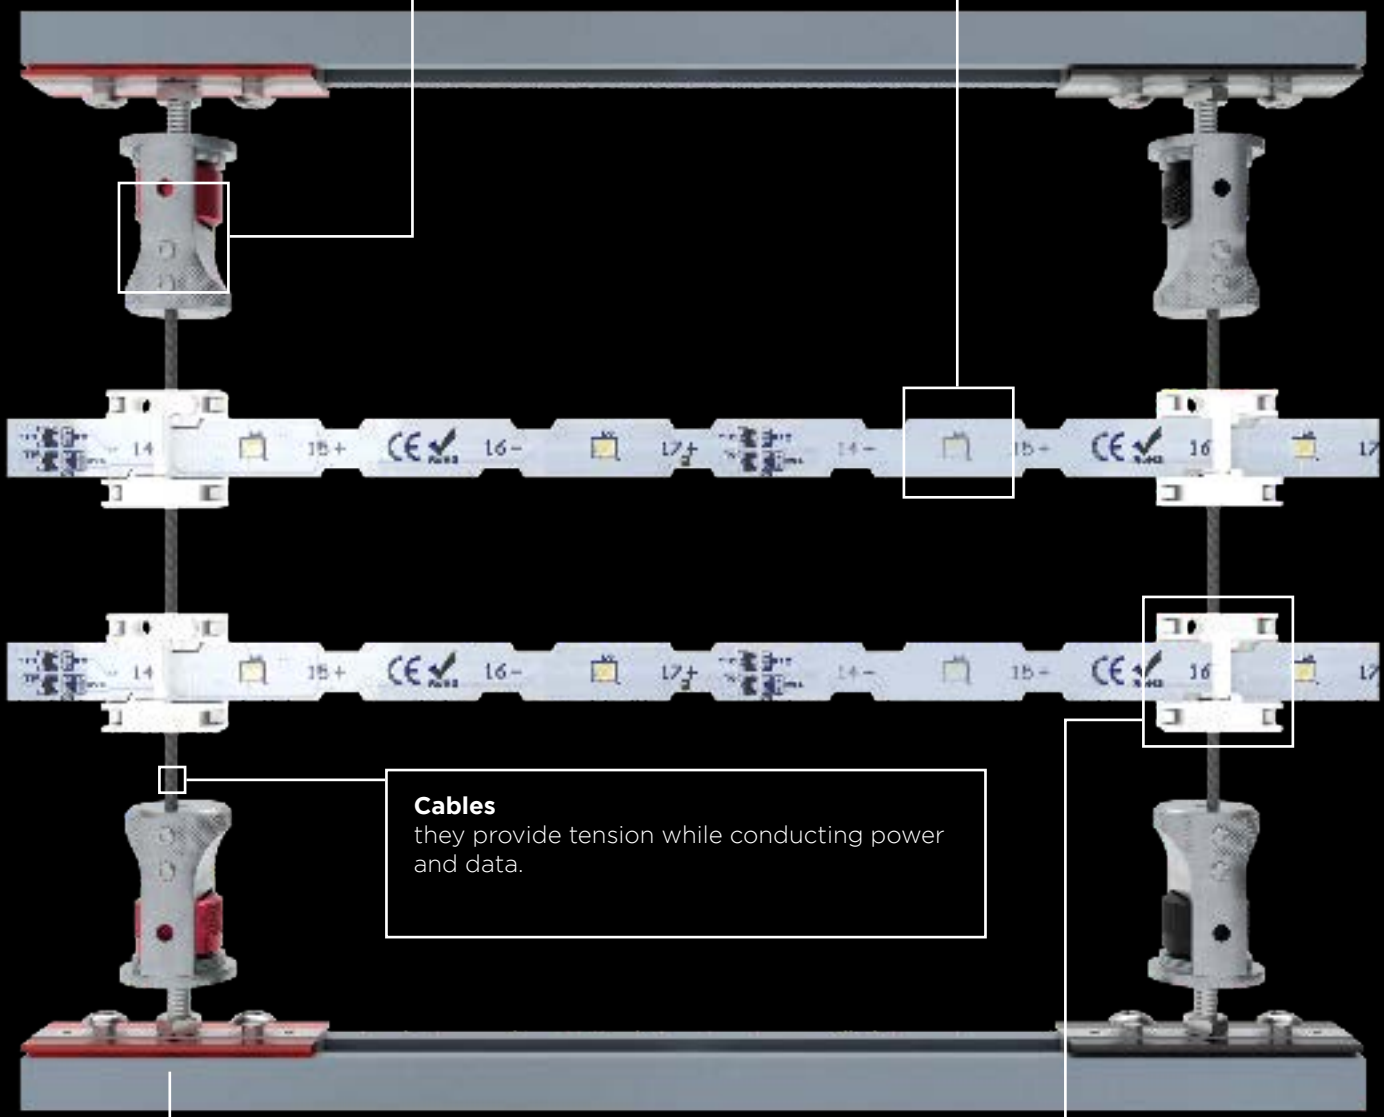
The Tension LED System utilizes our unique point-to-point substrate-free mounting design. It can be easily integrated into existing architectural designs to uniformly backlight an endless list of diffuser options, regardless of the plenum depth. The system is comprised of five main parts:

LED board
Cables
PCB Holder
Tensioner
Anchor

THE SYSTEM IS COMPRISED OF FIVE MAIN PARTS:

Tensioner
it provides tension to the cables.

LED board
offered in multiple configurations.



Cables
they provide tension while conducting power and data.

Anchor
connects electricity and mechanical anchors to frame.

PCB Holder
connects LED boards with cables - allows for easy maintenance

LIGHTING ENGINES

At TLS, a Lighting Engine is an illumination you choose to power your TLS product. Depending on the effect and mood you want to achieve, you can choose to have a fixed static lighting effect with Astra, an adjustable temperature with Sola, a variety of colours with Aurora, or animation of scenes with Vega.

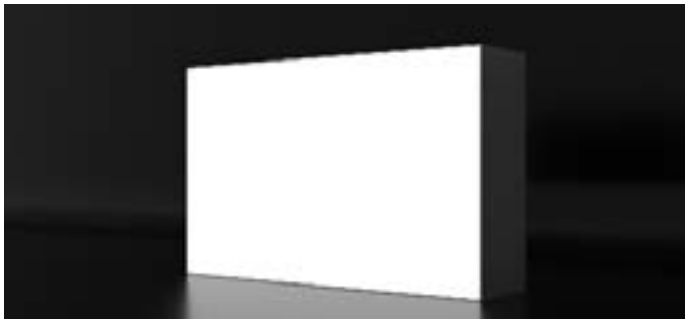
Which Lighting Engine to select?
Discover the four lighting effects that can power your space.

ASTRA

Static white
A static lighting solution that offers multiple CCT options from 2200k to 6500k. Providing uniform lighting.

Available in 7 temperatures:

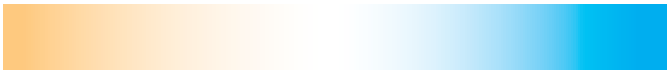
2200K 2700K 3000K 3500K 4000K 5600K 6500K

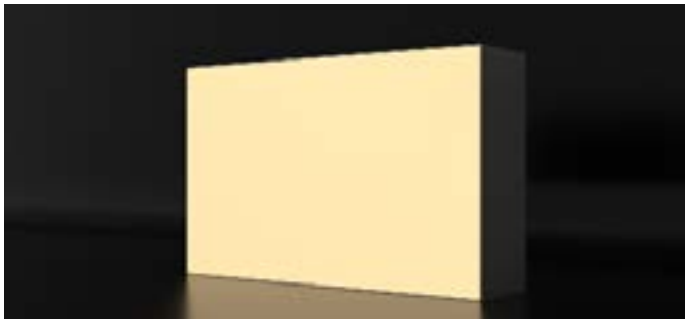


SOLA

Our tunable-white option, allowing individual control of both intensity and color temperature. The range of tunable CCT is between 2700k and 6500k.

Tunable white from:
2700K **6500K**





AURORA

Aurora is our colour-changing lighting engine programmable for up to 16.7 million colours. A white diode gives the option of pure white when required.

RGBW

VEGA

Vega is a standalone interface that provides precise, individual control over each pixel, enabling the display of pre-set scenes and motion graphics. It also supports interactivity and allows for easy programming of new scenes. Third party controls are available as well.

RGB
RGBW
WW

LUMIGRID

BACKLIT SOLUTION

LumiGrid is a narrow lightweight TLS grid extending from positive to negative steel wires, that conduct electrical current. This grid is anchored from the top and the bottom using a tension system. This flexible, substrate free solution can backlight diffusers and materials for numerous applications. It offers endless design configurations because it can be created in any shape, size, or lighting engine option.

LUMIGRID WITH TIFFANY GLASS

LUMIGRID WITH ONYX

LUMIGRID WITH PERFORATED METAL

LUMIGRID WITH GLASS

LumiGrid comprises slender, lightweight LED boards arranged in a contemporary lattice layout that spans across positive and negative stainless steel cables. This configuration not only fits snugly into narrow structural spaces but also offers the flexibility to be customized and maneuvered around obstacles with ease.

Within every architectural contour and silhouette, our grid stands ready to seamlessly integrate and illuminate your design vision. Delve into a spectrum of tailored applications, crafted to meet the diverse needs of our esteemed clientele.

LUMIPIX

OUTDOOR SOLUTION

This pixel-controlled LED product is specifically designed for outdoor applications such as building facades, stadiums, concerts. The mounting and power are both served through the same wires, resulting in a clean and minimalistic appearance with minimal wiring required. This TLS grid has the ability to create visually striking statements and enhance various applications by adding an architectural lighting layer. It can be customized to fit any shape, with no limitations on size.

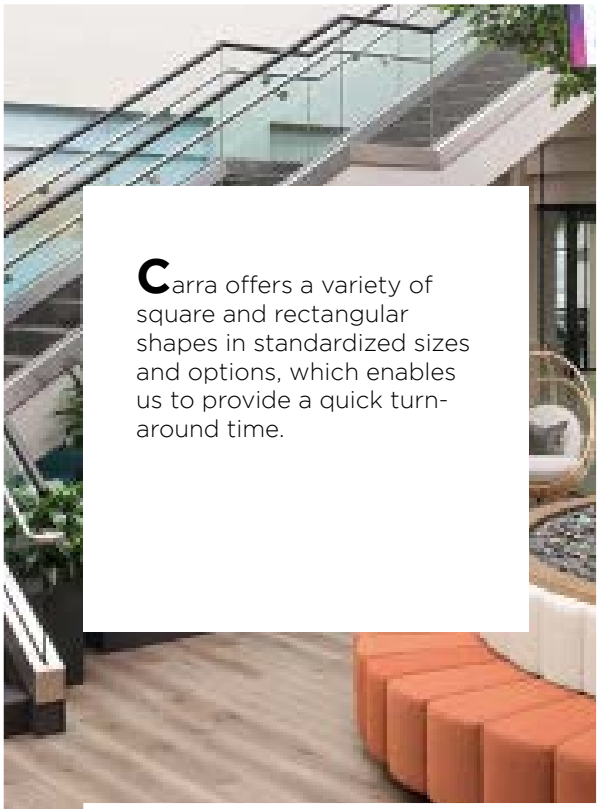
COLLECTION

Organic shapes can be an integral part of your illuminated designs. Available in static white, tunable white, RGBW, and RGB pixel controlled, the TLS LumiCloud™ has the lighting solution you require.

Designed, manufactured, assembled and shipped from our facilities in Montreal, Canada, our simplistic design enhances architectural illumination and improves room acoustics. Whether your design requires recessed, suspended or surface-mounted luminous panels, our LumiCloud™ has a turnkey solution.

We developed our collections to turn our vast offering into standardized products for simplicity. Browse our various shapes and sizes, inspired by form & function.

CARRA



Carra offers a variety of square and rectangular shapes in standardized sizes and options, which enables us to provide a quick turn-around time.

PRINT &
DISPLAY

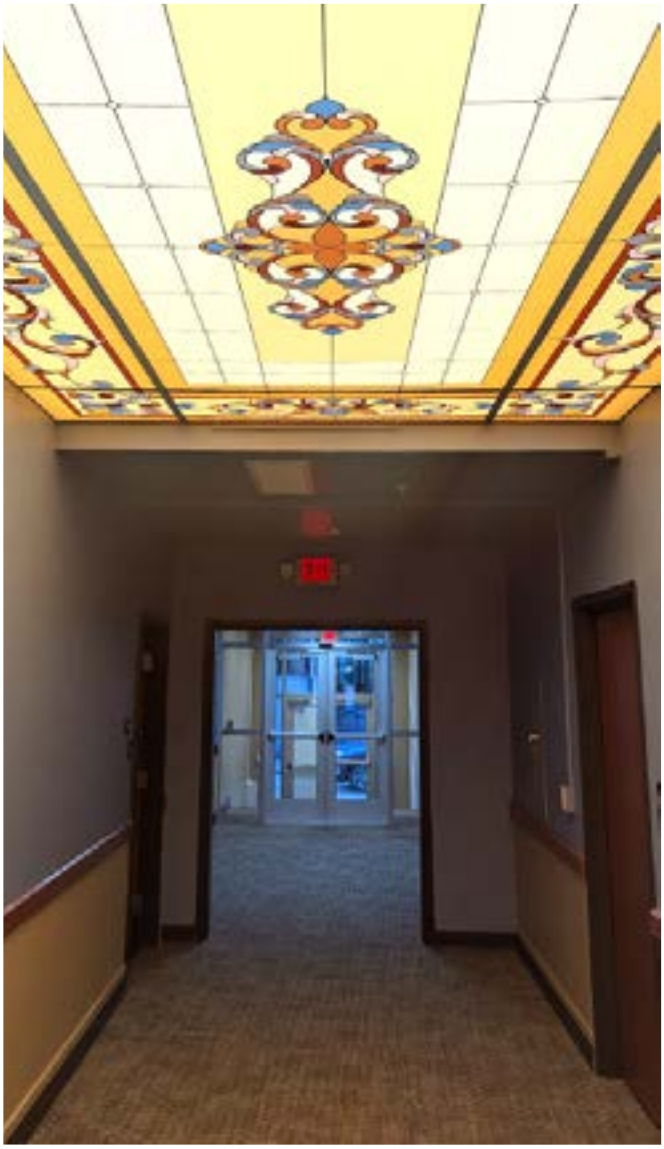
PRINT & DISPLAY

Whether you're rolling out a campaign across 1,000 stores or need a single print, we deliver the same exceptional service that our clients know and trust.

Our dedicated team is here to bring your vision to life—handling everything from layout and production to shipping and installation with precision and care.

Let us elevate your signage and maximize your visual impact every step of the way.

VERSATILE PRINT AND DISPLAY SOLUTIONS



In today's competitive business landscape, creating an impactful visual presence is essential. Our comprehensive range of print and display solutions is designed to enhance environments across industries, from hospitality and corporate offices to senior living communities, shopping malls, and retail spaces.

We specialize in delivering customized solutions that elevate aesthetics, improve functionality, and enhance customer experiences. Whether it's elegant wall graphics and wayfinding signage in hotels, inspirational branded décor in office spaces, or engaging storefront displays in shopping malls, we ensure every project is tailored to meet your unique needs. In retirement communities and senior living spaces, we focus on clear, accessible navigation and visually comforting designs that promote well-being.

Each application is crafted with precision and creativity, ensuring high-quality results that leave a lasting impression. Whether you're transforming a space, enhancing brand identity, or implementing practical wayfinding solutions, our expert team is here to guide you every step of the way.

Explore our diverse applications and discover how we can take your space to the next level.

DISCOVER THE POWER OF STRATEGIC PRINT AND DISPLAY APPLICATIONS

ENHANCE EVERY SURFACE WITH TARGETED PRINT SOLUTIONS

Our innovative print applications are designed to use every surface in your commercial space effectively. Highlight your brand with striking window graphics, direct foot traffic with vibrant floor designs, and create a cohesive aesthetic with custom wall displays. Each solution is tailored to your business, ensuring that every inch of your environment works to engage and inform your customers.

SEAMLESS INTEGRATION

At MG, we specialize in high-quality print and display solutions that blend elegance, functionality, and innovation. Designed for retail, hospitality, corporate, and healthcare spaces, our minimal yet impactful applications seamlessly integrate into their environments while enhancing visual engagement.

Utilizing premium print materials, UV 3D printing, Dye sublimation and advanced lighting, we craft sophisticated wayfinding, dynamic branding, and immersive wall graphics. Our proprietary TLS lighting technology further elevates designs, shaping mood and atmosphere with subtle illumination.

With a focus on architectural refinement and material integrity, MG transforms interiors into immersive, brand-driven experiences.

Wall Applications

TRANSFORM YOUR WALLS INTO IMPACTFUL DISPLAYS

Walls define your space—why not make them work for you? Our customizable wall solutions turn any surface into a dynamic marketing tool, seamlessly fitting any environment.

From sleek SEG fabric frames with backlit or front-lit options to elegant coverings like synthetic paper and canvas, we offer versatile designs that eliminate the need for plastering and painting—saving on construction costs. Easily update visuals anytime and enhance depth with 3D UV printing elements.

Whether for branding, storytelling, or ambiance, our high-quality wall displays bring creativity, sophistication, and adaptability to your space.

CORPORATE BRANDING

Elevate Your Brand with Custom Wall Graphics

Transform your space with custom wall graphics that seamlessly reflect your brand identity and values. Designed for impact, these elegant, high-quality displays create a clean, eye-catching statement while maintaining a refined aesthetic.

In client-facing areas, they make a lasting first impression, reinforcing your message and driving engagement.

EVENT PROMOTIONS

Amplify your event visibility with dynamic wall displays designed to captivate attention and communicate your promotional messages with impact. These eye-catching displays are perfect for trade shows, corporate events, and conferences, ensuring that your brand stands out in crowded spaces. By integrating bold visuals, compelling content, and strategic placement, these wall displays not only attract attendees but also leave a lasting impression.

COMMERCIAL DECOR

Transform your commercial spaces with durable, visually striking wall decor that not only captures the attention of clients but also leaves a lasting impression. By integrating high-quality materials with creative design, this decor enhances the aesthetic appeal of your environment, making it more inviting and engaging for visitors. Beyond just decoration, these custom wall installations serve as an extension of your brand, telling your story, showcasing your values, and creating an immersive experience that resonates with clients long after they leave. Our expert team will work with you to design and install wall displays that perfectly align with your business goals and aesthetic vision.

Ceiling Applications

TRANSFORM YOUR CEILING INTO A VISUAL EXPERIENCE

Ceilings offer a unique opportunity to enhance your business space with eye-catching designs that elevate your brand. Our custom ceiling displays turn overlooked overhead areas into captivating focal points, creating an immersive atmosphere that leaves a lasting impression.

From bold graphics to artistic installations, we design solutions that complement your environment while reinforcing your message. Whether you aim to inspire creativity, enhance ambiance, or showcase your brand identity in a fresh way, our team will craft and install ceiling displays tailored to your vision.

LIGHTBOXES

Our innovative lightboxes feature multi-layer printing technology, creating a striking three-dimensional effect that captivates and enhances any space. Powered by TLS lighting, they deliver uniform, vibrant illumination that adds depth and sophistication, transforming your brand into a standout decorative element.

Custom-designed to complement any aesthetic, these 3D lightboxes seamlessly elevate environments from upscale retail and corporate lobbies to hotels and beyond. Their flexible design allows for creative expression beyond traditional flat visuals, offering a dynamic, immersive experience that enriches any setting.

LUMICLOUD™

The LumiCloud™ is a custom luminous cloud with endless design possibilities. Extremely versatile, we can create any shape with virtually no size limitations. From circles, triangles, squares, ovals, hexagons, organic shapes, and more. Our LumiCloud™ luminous panels offer acoustic properties with an NRC value of >0.8 and edge-to-edge homogeneous illumination with a high level of versatility.

3D LIGHTBOXES

Our innovative lightboxes feature multi-layer printing technology, creating a striking three-dimensional effect that captivates and enhances any space. Powered by TLS lighting, they deliver uniform, vibrant illumination that adds depth and sophistication, transforming your brand into a standout decorative element.

Custom-designed to complement any aesthetic, these 3D lightboxes seamlessly elevate environments from upscale retail and corporate lobbies to hotels and beyond. Their flexible design allows for creative expression beyond traditional flat visuals, offering a dynamic, immersive experience that enriches any setting.

Floor Applications

VISUALLY ENGAGING
Capture attention with striking visuals that make your floor space a focal point of interaction.

SPACE EFFICIENT
Utilize every square foot of your venue effectively with displays that maximize space and enhance visitor flow.

DURABLE
Invest in long-lasting materials designed to withstand heavy foot traffic while maintaining vibrant, eye-catching colors.

ADHESIVE VINYL FLOOR GRAPHICS

Transform your space with high-quality, slip-resistant adhesive vinyl floor graphics designed for B2B environments. More than just signage, these graphics serve as a powerful marketing tool—ideal for guiding traffic, promoting offers, and enhancing brand visibility.

Tailored to your branding needs, they feature vibrant, fade-resistant colors that command attention. Whether in retail spaces or trade shows, our durable and cost-effective floor graphics ensure your message stands out.

FREE-STANDING SEG FRAMES

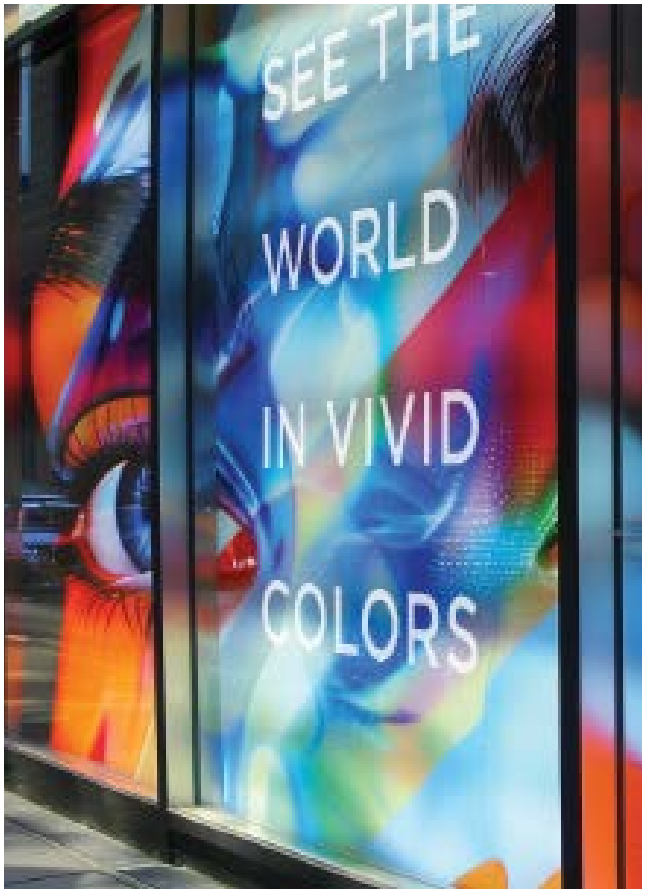
Ideal for exhibitions, corporate events, and retail spaces, our SEG frames combine modern aesthetics with practical, easy transport and assembly.

Featuring an elegant kakemono-style vertical design, these double-sided frames maximize visibility from multiple angles. With edge-to-edge homogeneous illumination—available in both lit and non-lit options—they offer exceptional versatility. Easily swap graphics for seasonal updates, making them a dynamic and cost-effective display solution.

FREE-STANDING DISPLAY

Tailored to meet the unique needs of businesses, these banners stand out with their lightweight design and ease of portability. Whether it's promoting a new product or communicating a corporate message, our glare-free fabric banners ensure your content is seen as intended, even under harsh lighting conditions. The high-quality print resolution guarantees that your brand's visuals are displayed with clarity and precision.

Ideal for trade shows, conferences, and corporate lobbies, our banners offer a professional look that captures and retains viewer attention.



Window Applications

CUSTOMIZABLE DESIGNS
Tailor your window displays to fit your brand identity and message perfectly.

DURABLE MATERIALS
Our graphics withstand the elements, ensuring long-lasting visibility and impact.

EASY INSTALLATION
Quick and easy setup with minimal disruption to your daily business operations.

ADHESIVE VINYL WINDOW GRAPHICS

Enhance your business's visibility with our high-quality adhesive vinyl window graphics, ideal for any commercial environment. These vibrant graphics not only grab attention but also effectively communicate your message, making them an excellent tool for both branding and privacy

Built for durability and weather resistance, our custom window graphics enhance brand visibility in both indoor and outdoor spaces. Whether promoting a product, service, or campaign, they create a striking visual impact.

Designed for hassle-free installation with minimal disruption, these adhesive vinyl graphics are easy to apply, remove, and update as your marketing needs evolve. Available in matte, gloss, and transparent finishes, they offer a tailored look to suit any brand aesthetic.

Our "one way vision" option allows for privacy while still displaying your message, and we offer custom cut-outs in any shape and varying degrees of opacity—from semi to fully transparent—to enhance both the aesthetics and functionality of your space.

Out of home Applications

WEATHER-RESISTANT MATERIALS
Engineered to withstand the elements, ensuring your message stays sharp in any weather condition.

VERSATILE DISPLAY OPTIONS
From banners to large-format print on various substrates, tailor your message to suit any outdoor space.

VIBRANT, EYE-CATCHING COLORS
Enhance your advertising spaces with high-impact, premium print solutions. Our advanced technology and superior materials ensure vibrant, durable, and attention-grabbing displays that maximize visibility.

With 30 years of expertise, we help OOH providers offer standout graphics that attract and retain top-tier advertisers, making every campaign more compelling..

STREET FURNITURE

Upgrade Lightboxes with Energy-Efficient TLS Technology

Retrofitting outdated fluorescent and high-power LED lightboxes? Our IP TLS technology offers a superior, maintenance-free solution with low power consumption, high CRI, and uniform illumination.

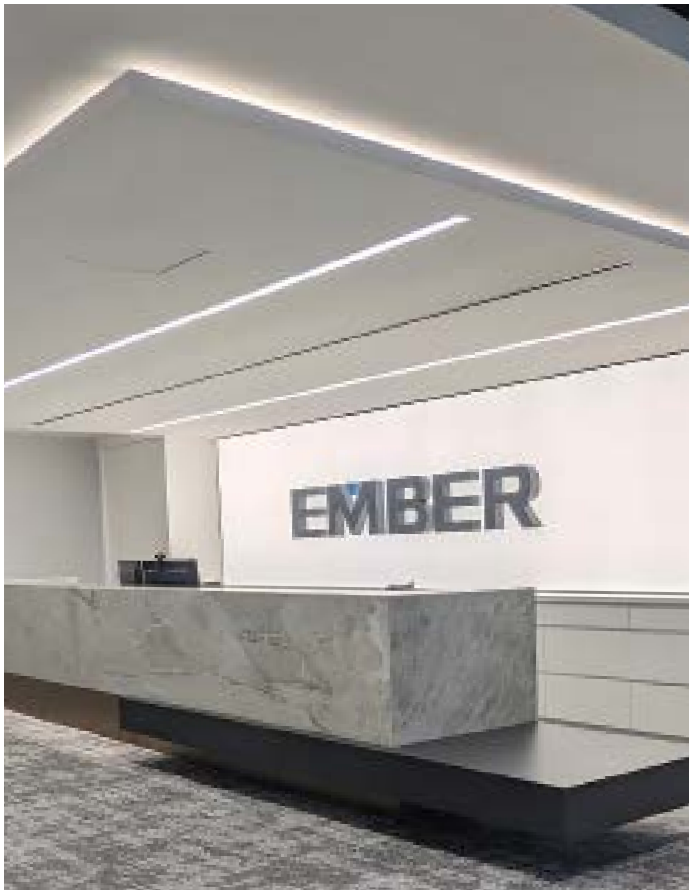
Designed for both indoor and outdoor applications, our custom-sized TLS system requires no backing and features a point-to-point tensioning system for even, heat-free lighting. Ideal for airports, bus shelters, and any Lightbox application, it delivers efficiency, longevity, and brilliant visual impact.

Signage

DIMENSIONAL LETTERING

Elevate your brand with high-impact **dimensional lettering**, crafted from premium materials like sleek metal, polished acrylic, or natural wood. Finished with durable powder coating or custom spray paint, they ensure long-lasting vibrancy and style.

Designed for both indoor and outdoor applications, these letters create a striking presence—whether on a building façade or in a corporate lobby—making a bold statement with depth and sophistication.



CHANNEL LETTERING

Enhance your brand's visibility with custom **channel lettering,** designed to stand out **day and night**. Perfect for **storefronts, business parks, and commercial spaces**, these three-dimensional letters create a striking presence.

Crafted from durable, weather-resistant materials and precision-engineered with **3D CAD design and CNC bending**, our channel letters ensure consistency and quality. Integrated **LED lighting** offers energy-efficient, high-impact illumination—maximizing visibility while reducing operating costs.
