

## PET Felt Cleaning Instructions

### *For Lighting Fixtures*

Thank you for choosing TLS Acoustical Solutions. To keep your product looking its best, follow these simple care guidelines:

### Regular Care

- **Dusting:** Use a vacuum with a **soft brush attachment** on low setting. Gently vacuum the felt in smooth, even strokes.
- **Light Debris:** Remove lint or small particles using a **lint roller** or low-tack tape.

### Spot Cleaning

If you notice a mark or smudge:

1. Use a **soft microfiber cloth** slightly dampened with clean water.
2. Gently **blot the area**—do not rub.
3. For tougher spots, you may use a **mild soap and water solution**. Apply sparingly and blot again with clean water afterward.
4. Allow the felt to **air dry naturally**.

### Important

To protect the appearance and performance of your fixture:

- Do **not** use bleach, harsh chemicals, or alcohol-based cleaners.
- Avoid soaking or over-wetting the felt.
- Do not use abrasive brushes, pads, or high heat sources.

### Maintenance Tip

For the best long-term appearance, we recommend light cleaning every **3–6 months**, depending on your environment.
