Elevate your lighting design with the Carra Vega, an acoustical luminous cloud that features cutting-edge pixel-controlled color-changing effects. Whether you want to simulate a moving sky, abstract patterns, or custom animations, this lighting fixture offers endless creative possibilities. Its enclosed system includes a blockout reflector for enhanced light efficiency, while the various mounting options allow you to seamlessly integrate it into any space. The Carra Vega is available in six sizes and three frame colors, providing both flexibility and innovation in one package.

The Circa Astra is a sophisticated acoustical luminous cloud that delivers uniform, edge-to-edge lighting. Available in multiple color temperature options, this fixture is perfect for those seeking versatile, high-efficiency lighting solutions. Its integrated blockout reflector maximizes lumen output, ensuring bright, consistent illumination. Choose from suspended, recessed, or surface-mounted options to match your design aesthetic. The Circa Astra is available in six sizes and can be dimmed with 0 to 10V or Dali for added control.

LumiPano™ Vega panels offer a unique blend of form and function with their versatile illuminated perforated metal design. These panels can be easily installed or removed thanks to the magnetic profile clips, providing quick access to the lighting engine and plenum. The TLS technology ensures uniform, diffused lighting, available in various color options including pixel-controlled RGB and tunable white. LumiPano™ is independently mountable, eliminating the need for a third-party T-bar ceiling, making it a streamlined choice for any space.

Bring the outdoors inside with LumiSky, a lighting fixture that replicates natural daylight through its regressed low iron glass, ensuring bright, even illumination without shadows. The high-resolution UV printing technology allows for limitless design possibilities, from cloudy skies to serene landscapes. LumiSky's consistent edge-to-edge lighting creates a stunning visual effect, and its 2' x 2' configuration makes it an easy addition to any interior design project, providing both functionality and aesthetic appeal.
