

3D MeshFlex

Lightweight and versatile material designed for exceptional print clarity and airflow. Perfect for Dye sublimation printing, this fabric delivers vibrant, high-quality graphics while allowing breathability, making it ideal for indoor and outdoor applications. Its unique perforated design ensures durability in windy conditions without compromising visual appeal.

Technical Information

PN	FAB-DY-TR-MFL-010
Characteristic	Indoor / Outdoor
Print	DYE SUBLIMATION
Material	100% polyester
Dimension	3.2x100M
Weight (Sqm)	42g
Cutting Method	Laser / Zund
Transmission	N/A
Fire Classification	N/A
SEG Compatible	Yes

Advantages

- Combines high-quality image reproduction with superior airflow and reduced wind resistance.
- Lightweight design simplifies setup and storage while maintaining long-lasting durability.
- Ideal for environments where air circulation and visual appeal are both critical.
- Compatible with a variety of frame systems for easy installation.

Applications

- Event Backdrops
- Outdoor banners
- Trade show displays
- Fence wraps
- Promotional flags
