

Light Foil (Cold)

Light Foil (Cold) is a PVC-based material designed for high-quality printing, offering durability, flexibility, and enhanced reflectivity. It is ideal for indoor and outdoor applications where high contrast, shine, or metallic effects are needed.

Technical Information

PN	FOI-UV-DI-LTF-017
Characteristic	Indoor / Outdoor
Print	UV
Material	PVC
Dimension	3.2x100M
Weight (Sqm)	215g
Transmission	54%
Cutting Method	Zund
Fire Classification	NFPA-701, B-s2, d0 (in acc. with DIN EN 14716)
SEG Compatible	Yes

Advantages

- High-quality print performance.
- Durability and longevity.
- Versatile and flexible.
- Easy to work with.

Applications

- Retail and commercial displays
- Trade shows and events
- Corporate and office branding
- Specialty and industry uses
