

Light Foil (Hot)

Light Foil (Hot) is a PVC-based heated foil engineered for premium printing applications. It combines durability and flexibility with enhanced reflective properties, making it an excellent choice for both indoor and outdoor use. Its unique surface delivers high contrast, vibrant shine, and metallic-like effects, ensuring striking visual impact in signage, displays, and decorative finishes.

Technical Information

PN	FOI-UV-DI-LTF-047
Characteristic	Indoor / Outdoor
Print	UV
Material	PVC
Dimension	3.2x100M
Weight (Sqm)	223g
Transmission	54%
Cutting Method	Zund
Fire Classification	NFPA-701, B-s2, d0 (in acc. with DIN EN 14716)
SEG Compatible	Yes

Advantages

- High-quality print performance.
- Durability and longevity.
- Versatile and flexible.
- Easy to work with.

Applications

- Retail and commercial displays
- Trade shows and events
- Corporate and office branding
- Specialty and industry uses
